

BMED 2110 Project Phase 2
Due Date: Submit on Canvas by 8:00 pm 4/22/2021
(this is a group assignment)

Grading Specifications for Phase 2 product (5 points)

Goal: Present rationale and persuasive elements of a redesign proposal

Audience: Engineering and science background professionals who may be able to support this redesign.

Section	Section Content
Visual representations (0.5 points per criterion)	Schematics representing the process
	Quantitative values, time frame and spatial scale
Analysis of bias (0.5 point per criterion)	The facts, theoretical concepts, calculations and estimations used to analyze and demonstrate the flawed biased nature of the design.
	Narrative interpretation of bias argumentation (verbal description)
Proposing new recommendations (1 point per criterion)	The facts, theoretical concepts, calculations and estimations used to support the proposed changes to the existing design or a new design.
	Detailed elaboration of proposal: Persuasive narrative argument (verbal description)
References (0.5 points, all or nothing)	Citations in APA format, both in text and reference list
	Enough citations of peer-reviewed literature to support the arguments made in the case study
Format (0.5 points, all or nothing)	Length: 800-1000 words
	Times New Roman, 12-point, 1" margins
	Names of authors
	Submit PDF (product 2) on Canvas
	Contribution: Each member should write what they did to contribute to the project (word limit: 50 words each), and that section needs to be signed by all participants. The contribution can be included within the pdf of the product (first page), or it can be saved as separate document.
